

Project: Parentthorn High School

Construction: Refurbishment

Main Contractor: Cruden Construction Ltd

Carried out: June to July 2008

Parentthorn High School has undergone a major refurbishment with a significant new build to suit.

The key here was to provide a complete overlay of the existing roof in excess of 3500m² in a 6 week fixed program. That breaks down to 10,500m² of membrane laying plus 3500m² of 90mm insulation.

So in essence a considerable work force was employed to deliver a large scale package in a short period of time as substantial liquidated damages was strictly in force for the duration for non completion.

Furthermore all perimeter edge Facia required renewal to accommodate the new height in insulation, this in turn had to co-inside with the window renewal program with a strong emphasize on colour match.

D.Shawcross carried out the work in 8 weeks to keep within the bounds of the contract thus minimising disruption to the school.
